Government Contracting

If you are a small business looking to expand your customer base have you considered the government? Are you looking for recession proof customers? There are hundreds of government agencies in Michigan alone. Each of them with the same needs of your traditional customer base.

Local, state, and federal agencies all purchase the same goods and services your B2B customers and B2C clients need.

Without exception from ink pens, auto mobile insurance, cell phone service, janitorial supplies and services, IT support, to manufacturing; our government spends billions of dollars to simply function.

Can you provide any of the necessary goods or services?

If the answer is yes. Then this is for you.

Best Practices Consulting Services provides businesses with the certifications necessary to secure and bid for government contracts. We remove the overwhelming multitude of documents to a simple process, which we will completely handle for you.

After certification, you may need assistance identifying the appropriate bid avenues, well we'll help there too! We'll streamline all bids within your area of expertise and interest.

Additionally, we offer assistance with collaboration efforts to help fortify the capital and resources necessary to fulfill the bid requirements.

Don't hesitate. Reach out to us to help you find your next customer! We are ready to help create another revenue stream. My name is Laura Sigmon, and I'm eager to assist. Just make the call!
